The Commonwealth of Kentucky
Kentucky Unemployment Insurance Portal (KUIP) ICESA File Format Reference Guide

Table of Contents

Summary

Each fiscal quarter, **employers** or their approved **third-party administrators (TPAs)** report wage and tax information to the Kentucky Office of Unemployment Insurance. These reports must be submitted in the correct format. This document describes the ICESA (Interstate Conference of Employment Security Agencies) file format and submission process. Below, employers and TPAs will find technical requirements for formatting and submitting quarterly wage and tax reports in an ICESA file format.

- ICESA is a fixed-length file format.
- Each line of information is known as a *record*.
- Each record (line) must be exactly 275 characters.
    - The file specifications section of this document contains the position and length of each field in the file.
- Each record (line) either:
    1. Provides details about the employer.
    2. Provides identification and wage information for each individual employed during the period.

Important Notice

The ICESA submission process for KUIP differs from Kentucky's former unemployment insurance wage reporting system.

> **KUIP only requires the submission of the E-Record – Employer Header Record and S-Record – Employee Detail Record**. Any additional record types submitted (e.g., A, B, T, and F) will be disregarded by KUIP.

Employer Wage Reporting Requirements

Employers

- Employers must submit individual wage reports for each reporting period and reporting year.
- Subject employers with no wages to report for a particular quarter and year must submit a Zero Payroll Employer's Quarterly Unemployment Wage and Tax Report.
    - No file upload is required.
    - Any adjustment made after the deadline and which adds UI gross wages to any report previously submitted with zero UI gross wages will result in penalties.

- o **Please Note**: Employers must only include adjusted records when submitting an adjusted ICESA file.

Third-Party Administrators

- TPAs may submit a single ICESA file containing records for multiple employers across different quarters and/or years.
- TPAs may submit both original and adjusted records in an ICESA file. However, for each KEIN and quarter/year combination, all records must be of the same type— either all original or all adjusted.
- TPAs must submit a Zero Payroll Employer's Quarterly Unemployment Wage and Tax Report on behalf of subject employers with no wages to report for a particular quarter and year.
  - o A file upload is required. For additional information on the file specifications for the Zero Payroll Employer's Quarterly Unemployment Wage and Tax Report, please reference the KUIP Zero Payroll File Format Reference Guide.
  - o Any adjustment made after the deadline which adds UI gross wages to any report previously submitted with zero UI gross wages will result in penalties.
  - o **Please Note**: When submitting an adjusted ICESA file for an employer, ensure only adjusted records are included in the file.

Due Dates

- Employers within Kentucky must submit wage reports quarterly with the following dates:
  - o 1st Quarter (January, February, March): April 30th
  - o 2nd Quarter (April, May, June): July 31st
  - o 3rd Quarter (July, August, September): October 31st
  - o 4th Quarter (October, November, December): January 31st
- **Please Note**: If a quarter's due date falls on a weekend or holiday, the due date will be the next business day.
- Failure to report wages by the due date will result in penalties per KRS 341.262 and may result in the employer's wages being estimated per KRS 341.263.

Multiple Work Site Businesses

- All employers may choose to report employee wages under one main reporting unit or to set up each work site as separate reporting units.
- A reporting unit refers to a distinct business location by number based on how many locations an employer has.

- o e.g., A franchisee has four locations in Kentucky. The franchisee can elect to report as one main unit (0000) or as multiple units. Each additional site would have a sequential reporting unit (0001, 0002, 0003).
- If reporting multiple units, TPAs may report wages for each unit in the same file by specifying the reporting unit for each individual employee in the S-Record.

- Unit numbers must be registered in the KUIP system before wages can be reported for them.

  - o The main unit (0000) is set up automatically after registration.
- Users can set up their reporting units during the registration process or create them later via Employer Account Maintenance in the KUIP system.
- **<u>Please Note</u>**: Whether reporting as a single unit or multiple units, employers must submit wages for all employees across all locations.

File Specifications

- File Name: There are no restrictions on the file name.
- File Size: Maximum file size to be determined pending technical assessment.
- File Extension: .txt files only
- Files containing more than 500 records are processed nightly.
  - You can view the status of your file via the *Submission History screen* located under the *Wage Detail Reporting* tab on the left navigation pane in the KUIP system. Once the file is processed, you can view file errors using the same screen.
- Each record in the file must be exactly 275 characters.
- All fields must be populated to their exact length with spaces or another character.
  - Left-justify: Enter your information at the start of the field and fill the rest with spaces.
  - Right-justify: Fill the field with either spaces or zeroes based on the file specifications, then complete the field with your information.
- **Please Note**: Any fields that are **NOT used by KUIP can be left blank** by filling them with spaces.
